Purpose of the Blueprint for the Clean, Sustainable Energy Age

Sustainable Development Goals 2030 with answers to the COP21 agreements

Independent of the circumstance, whether all nations ratify the COP21 agreements or not, and independent of contradictory theories about the causes of global warming (SDG13), the protection of the health of all life (SDG 3) and the biospheres (SDG 14 &15) necessitate clean sustainable energies (SDG7) to meet ultimately all 17 Sustainable Development Goals until 2030 and beyond, since energy influences all other SDGs like livelihood and hunger (SDG1 & 2), education (SDG4), gender equality (SDG5), water quality (SDG6), work conditions and economic growth (SDG8), the integral economy infrastructures including clean transportation (SDG9) and sustainable communities (SDG11), responsible consumption (SDG12), peace, avoiding energy wars (SDG16), and public-private PPP partnerships (SDG17).

Therefore the authors of the Blueprint for the Clean, Sustainable Energy Age are describing all ways and means for the implementation of SDG 7 to ensure access to affordable, reliable, sustainable energy for all in conjunction with the reduction and ultimate elimination of the causes necessitating this transition.
